Facts & Trends

2010

Office of Institutional Studies and Policy Analysis

Preface

Facts & Trends is designed as a basic reference document with admissions, financial aid, enrollment, persistence, graduation and outcomes, degree, semester credit hour, faculty and staff, research, and financial information for the nine academic and six health-related institutions and The University of Texas System as a whole. This document is intended to provide accurate and consistent information for internal use and for the general public, and as a statistical supplement to the U.T. System Accountability & Performance Report. For the most part, data are reported for the most recent five years to identify trends over time.

Data maintained by the Texas Higher Education Coordinating Board have been used extensively in this publication. However, these data may vary somewhat from information presented and used internally by individual System institutions due to differences in management information systems, data definitions and intended application.

In addition, several other sources were used to compile the tables in this document, including:

- The University of Texas System *Accountability and Performance Report*:
<http://www.utsystem.edu/osm/accountability/homepage.htm>
- The University of Texas System Consolidated Annual Financial Report:

| Amount Expended for Administrative Costs, Academic and Health Institutions..... | 259 |

General Analysis – Admissions and Financial Aid

U. T. System is committed to access and affordability for college bound students in Texas. Admit rates, the percent of students who applied and were admitted, are over 70% at five of the academic institutions. Financial assistance is available to students with need through tuition set asides and guaranteed tuition programs. Since tuition deregulation, students and faculty are increasingly involved in the tuition setting process and are developing flexible tuition plans that meet the needs of their institution and community.

Admission Trends

Overall, U. T. System academic institutions (excluding U. T. Brownsville) received 68,152 applications, admitted 45,021 students and enrolled 22,192 first-time undergraduates in fall 2009. The admit rates ranged from 48.8% at U. T. Dallas to 98.4% at U. T. El Paso, and the ratio of admits to those who actually enrolled ranged from 40.2% at U. T. Permian Basin to 65.0% at U. T. Pan American.

The percent of first-time enrolled students from Texas who were in the top 10% of their high school class at U. T. Austin increased to 80.4% in fall 2009. At other U. T. System institutions, the top 10% represented less than one-third of first-time enrolled students from Texas.

From fall 2005 to fall 2009, average SAT test scores for entering freshmen increased by 10 or more points at two U. T. System academic institutions (U. T. Permian Basin and U. T. San Antonio), while ACT test scores increased at three institutions (U. T. Austin, U. T. Dallas and U. T. San Antonio). U. T. San Antonio had the largest increase in average SAT scores, from 996 to 1033.

During the same time period, average GRE test scores for entering graduate students increased by 10 or more points at three U. T. System academic institutions (U. T. Brownsville, U. T. Pan American, and U. T. Permian Basin). Average GMAT scores also increased at the majority of the institutions. LSAT test scores increased slightly at U. T. Austin.

Financial Aid

Based on actual fee bills in fall 2009, the average total academic cost for resident undergraduates at academic institutions ranged from \$2,764 at U. T. Pan American to \$4,915 at U. T. Dallas. For health institutions, the average total academic cost for resident undergraduates ranged from \$1,574 at M. D. Anderson to \$4,518 at the HSC-San Antonio.

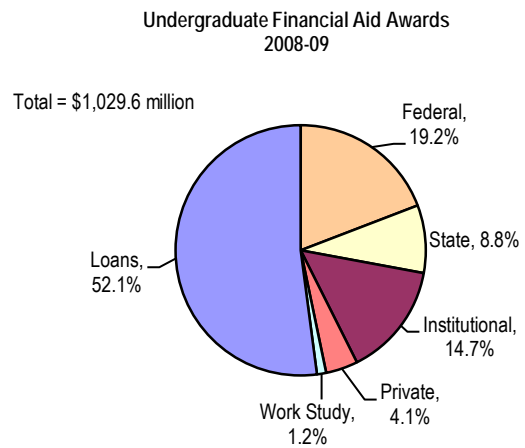

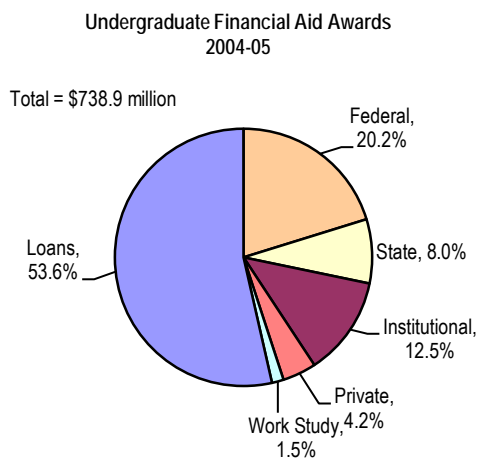

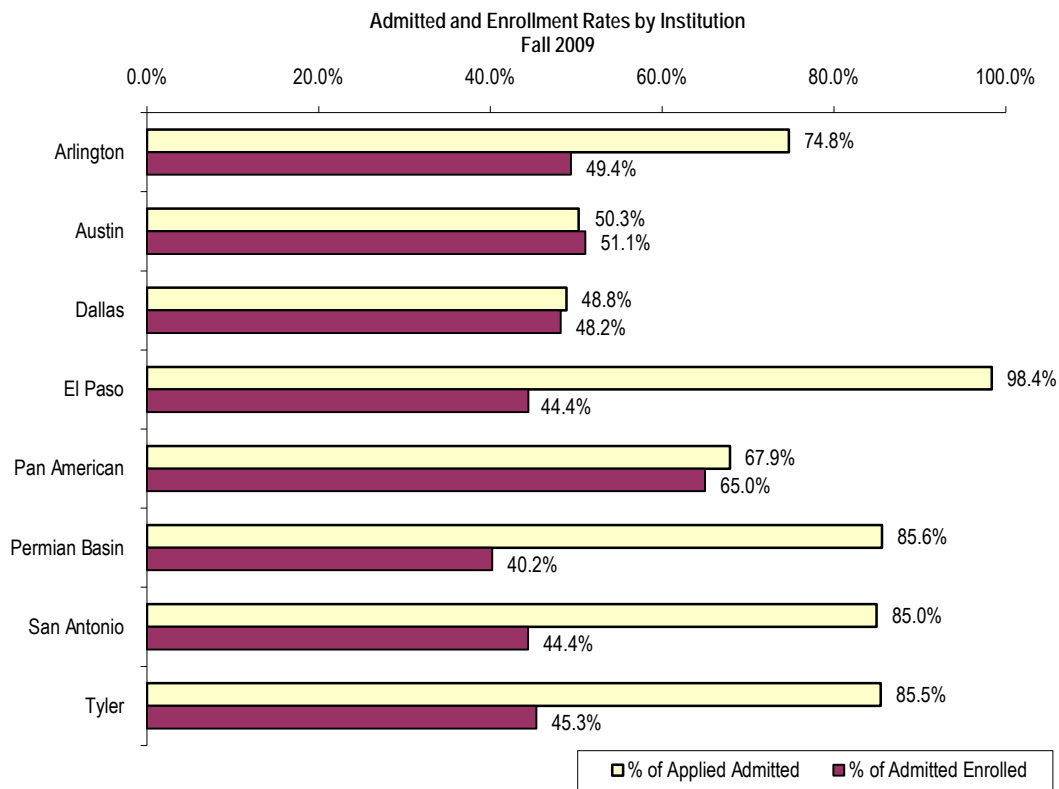

For academic year 2008-09, the U. T. System average total academic cost was \$7,471. Almost 45% of full-time undergraduate students received need-based grant aid. For these students, the net cost (after aid) was \$1,569, a discount of 79%. Applying this amount of aid across all full-time undergraduate students, the average net cost would have been \$4,830, a discount of 35%.

The number and total amount of undergraduate financial aid continues to increase at all U. T. System academic institutions. In 2004-05 undergraduate awards totaled around \$738.9 million. In 2008-09 undergraduate awards totaled over \$1 billion, an increase of 39.3%.

From 2004-05 to 2008-09, as a result of tuition set asides and increasing institutional support,

- The total amount of institutional awards increased from \$92.2 million to \$151.2 million, an increase of 64.0%
- Institutional awards, as a percent of all financial aid increased from 12.5% to 14.7%

Admissions and Financial Aid Characteristics

Notes:

Applicant totals may vary from an institution's internal reports because of different definitions used by the Texas Higher Education Coordinating Board to count applicants.

Applied and admitted data are not available for U. T. Brownsville because most students matriculate through Texas Southmost College. First-time undergraduate enrollment and TX Top 10% data (including students enrolled at TSC) were provided by U. T. Brownsville and did not include summer entrants until 2008.

A data reporting error resulted in TX Top 10% enrolled being underreported at U. T. San Antonio in fall 2005. Supplemental data from U. T. San Antonio indicate that 383 TX Top 10% students enrolled, comprising 8.9% of TX first-time undergraduate enrollment.

Prior to fall 2006, the applied and admitted headcounts at U. T. Tyler may have included transfer applications. Reports to the Coordinating Board were corrected in fall 2006 to only include first-time undergraduate applications.

N/A - Data not available.

Notes:

The total academic costs at U. T. Institutions represent the sum of all statutory tuition, designated tuition, and board-authorized tuition (where applicable), along with mandatory fees which now include college and course fees.

Total academic costs for U. T. Austin and U. T. Brownsville in fall 2005 are based on flat rate tuition. Prior to fall 2005, traditional and flat rate tuition were weighted to calculate average costs at U. T. Austin.

U. T. Arlington implemented flat rate tuition in Fall 2006.

U. T. Brownsville was granted permission by the Board of Regents to distribute the majority of a two-year allowable increase in FY 2008-09 to offset the impact of a new student satisfactory academic progress policy.

Cost information is derived from actual fee bills for resident undergraduate students enrolled for 15 semester credit hours.

HSC-Houston did not have any resident undergraduate students enrolled for 15 semester credit hours in fall 2008.

| Tyler | 5,926 | 41.9 | 5,899 | 27 | 99.5 | 3,456 | 41.7 |
| System Average | \$7,471 | 44.7% | \$5,902 | \$1,569 | 79.0% | \$4,830 | 35.3% |

Notes:

¹ Total academic costs represent the sum of all statutory tuition, designated tuition, and board-authorized tuition (where applicable), along with mandatory fees which now include college and course fees. Academic cost information is derived from actual fee bills for resident undergraduate students enrolled for 15 semester credit hours in the fall and spring semesters. Therefore, these figures represent costs for a total of 30 semester credit hours.

² The average net cost for all full-time students is derived by subtracting the total need-based grant aid from the total academic costs of all students and dividing by the total number of students.

³ In 2008-09, the average need-based grant was larger than the average academic cost at U. T. Brownsville, U. T. El Paso, and U. T. Pan American to help cover other student expenses, such as housing, transportation, and books and supplies. For this analysis, only grant funds used to cover academic costs were included for these institutions.

General Analysis – Enrollment

In 1999 the Texas Higher Education Coordinating Board (THECB) published the first *Closing the Gaps (CTG)* report and challenged colleges and universities in the state of Texas to increase the number of students participating in higher education. U. T. System met this challenge by increasing both the number and diversity of its student body by the first benchmark in 2005. In order to meet the 2010 target of 203,422 students, total enrollment at U. T. System must increase by approximately 0.6% for the next year.

Enrollment Trends

In fall 2009, total enrollment at U. T. System institutions was 202,240 students, an increase of 16,424 students (8.8%) from fall 2005 and 7,133 students (3.7%) from fall 2008.

- Enrollment at academic institutions was 189,980, an increase of 15,134 students (8.7%) since fall 2005 and 6,754 students (3.7%) since fall 2008.
- Enrollment at health institutions was 12,260, an increase of 1,290 students (11.8%) since fall 2005 and 379 students (3.2%) since fall 2008.

The proportion of undergraduate enrollment at U. T. System academic institutions increased slightly from 78.4% in fall 2005 to 78.9% in fall 2009. At the health institutions, the proportion of graduate and professional students decreased, from 45.1% to 41.8%, and 37.5% to 36.9% respectively.

Overall, gender distributions at U. T. System remained fairly steady, with male enrollment around 47% and female enrollment around 53%. The proportion of women attending the health institutions decreased slightly from 61.0% in fall 2005 to 59.9% in fall 2009.

As the population of Texas became more diverse, ethnic distributions at U. T. System institutions also changed from fall 2005 to fall 2009.

- Systemwide, the percentage of white students decreased slightly from 40.8% to 37.1%.
- At the academic institutions, the proportion of African American students increased from 5.2% to 6.1%, and the Hispanic population increased from 37.8% to 40.3%.
- At the health institutions, the proportion of African American students increased from 6.1% to 6.7%.

First-time Undergraduates

Enrollment of first-time undergraduates at the U. T. System academic institutions increased from 22,026 in fall 2005 to 24,378 in fall 2009, an increase of 10.7%. In fall 2009, first-time undergraduates are predominantly female (51.5%), full-time (94.9%) and non-white. Between fall 2005 and fall 2009, the proportion of white students decreased from 37.4% to 32.8%, while the proportion of African American students increased from 5.6% to 6.3%, Hispanic students from 42.4% to 46.0% and Asian American students from 10.3% to 12.0%.

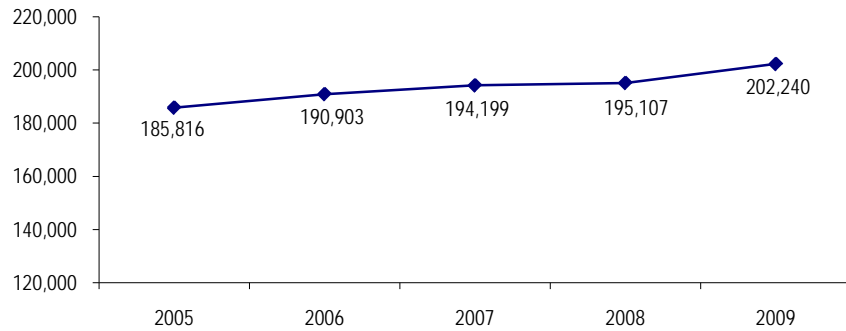

Transfers

Transfer enrollment has increased 13.9% since fall 2005 from 12,453 to 14,186 undergraduate transfers entering U. T. System academic institutions in fall 2009. Most of this growth was from fall 2008 to fall 2009, with an increase of 13.1%.

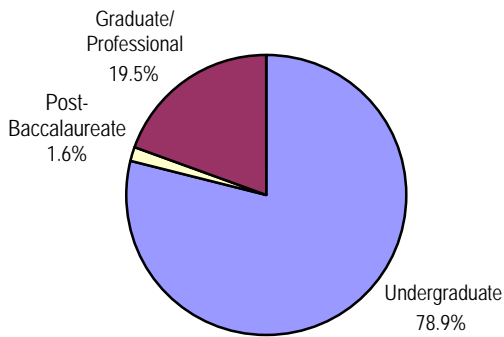

In fall 2009, transfer students are predominantly female (54.5%), transferred from a Texas community college (64.5%), and are ethnically diverse. About 41.2% of transfers are white, 34.9% are Hispanic, 9.2% are African American and 8.1% are Asian American.

Notes:

In fall 2007, because of a recent software conversion, over 1,000 students were incorrectly classified as unknown instead of international at U. T. Arlington. Based on revised figures from U. T. Arlington, the correct international enrollment for fall 2007 is as follows: 764 or 4.1% undergraduates, 1,918 or 31.6% graduates and 2,682 or 10.8% total enrollment.

Undergraduates with total semester credit hours of 12 or greater are considered full-time students. Post-baccalaureates and graduates with total semester credit hours of 9 or greater are considered full-time students.

General Analysis – Persistence, Graduation and Outcomes

In February 2006, the U. T. System Board of Regents passed a resolution making the improvement of graduation rates one of its highest priorities for the next decade.

The U. T. System Graduation Rate Improvement Initiative called for the nine academic institutions to set graduation rate targets for 2010 and 2015. These targets were approved by the Board of Regents in May 2006. While the impact of this initiative cannot be fully measured until the entering class of fall 2006 graduates, most institutions are already improving their graduation rates.

First-year persistence is an early indicator of student success. Based on a comparison of the entering classes of 2004 and 2008, first-year persistence rates for first-time, full-time degree-seeking undergraduates increased for four institutions:

- U. T. El Paso, from 68% to 70%
- U. T. Pan American, from 67% to 73%
- U. T. Permian Basin, from 57% to 61%
- U. T. Tyler, from 60% to 64%

Based on a comparison of the entering classes of 1997 and 2002, the most current information available, six-year graduation rates from the same institution increased for five institutions. U. T. Pan American has exceeded its 2010 target (35%) with a six year graduation rate of 36% for the fall 2002 cohort.

- U. T. Austin, from 71% to 78%
- U. T. Dallas, from 57% to 59%
- U. T. El Paso, from 26% to 31%
- U. T. Pan American, from 26% to 36%
- U. T. Permian Basin, from 29% to 31%

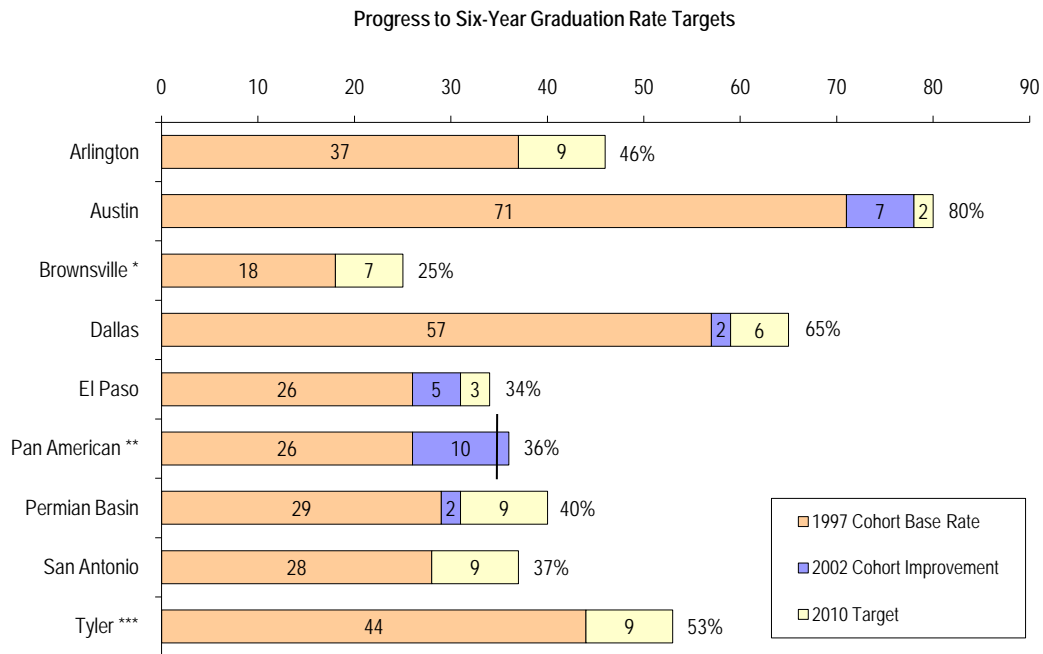

Graduation rate effectiveness can also be measured by the percentage of students who graduate or persist at any Texas institution of higher education. These rates are especially important for students who enter under the Coordinated Admission Program (CAP) and are expected to continue their studies at another U. T. System institution. The six-year composite graduation and persistence rates from the entering class of fall 1998 to the entering class of fall 2002 increased for these four institutions:

- U. T. Arlington, from 60% to 66%
- U. T. Austin, from 85% to 87%
- U. T. El Paso, from 56% to 58%
- U. T. Pan American, from 54% to 61%

Improving the graduation rates of students who transfer from a community college is also a priority of the U. T. System. A community college initiative has been developed in an effort to streamline and enhance the pipeline from community college to universities. The four-year graduation rates for community college transfer students entering U. T. System academic institutions with 30 or more credit hours in fall 2005 were:

- Over 40% - U. T. Arlington (46.0%), U. T. El Paso (48.6%), U. T. Permian Basin (42.7%), and U. T. San Antonio (48.8%)
- Over 50% - U. T. Tyler (51.1%)
- Over 60% - U. T. Austin (68.6%), U. T. Dallas (61.7%), and U. T. Pan American (62.7%)

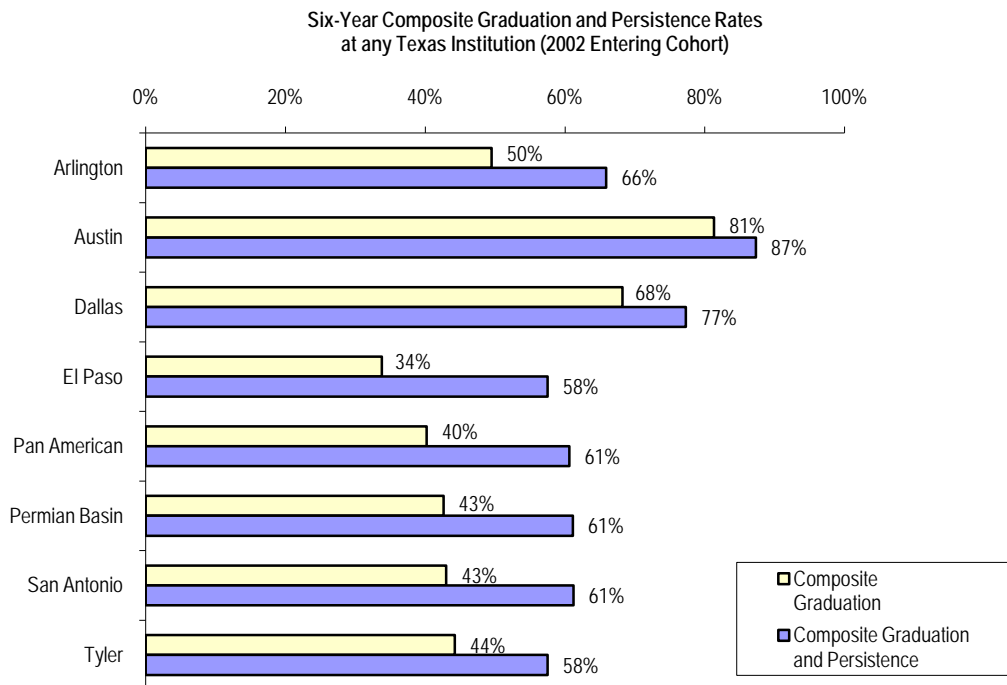

Persistence, Graduation and Outcomes

* 1997 graduation rate data not available for U.T. Brownsville; thus, the 2000 cohort was used as the base rate.

** U. T. Pan American exceeded 2010 target of 35%.

*** U. T. Tyler did not admit lower division students until 1998; thus, the 1998 cohort was used as the base rate.

| Academic Total | | 18,427 | 20,082 | 20,838 | 20,265 | 21,374 |

Notes:

Includes undergraduates who attended college for the first-time in the prior summer term, as well as first-time fall entrants. Full-time undergraduates are enrolled for 12 or more hours in the fall semester and are in a degree seeking program.

U. T. Brownsville's counts are not included because first-time undergraduates typically matriculate at Texas Southmost College.

| Permian Basin | 57.3 | 57.0 | 61.9 | 54.0 | 61.4 |
| San Antonio | 58.0 | 64.5 | 65.9 | 58.3 | 56.0 |
| Tyler | 60.4 | 58.7 | 67.5 | 65.4 | 64.2 |

Notes:

Includes undergraduates who attended college for the first time in the prior summer term, as well as first-time fall entrants. Full-time undergraduates are enrolled for 12 or more hours in the fall semester and are in a degree-seeking program. Persistence rates for entering cohorts may be inconsistent because of variability in social security numbers (SSNs). Beginning in fall 2007, students enrolled in the Coordinated Admission Program (CAP) were included in the entering cohort. Because of this change, persistence rates for institutions with a high percentage of CAP students (U. T. Arlington and U.T. San Antonio) are not comparable to previous years. U. T . Brownsville is not included because first-time undergraduates typically matriculate at Texas Southmost College.

Notes:

Graduation rates are for first-time, full-time, degree-seeking undergraduates who begin in the summer/fall of the enrollment year and graduate at the same institution. The cumulative rates represent the sum of degrees conferred at the end of the fourth, fifth and sixth academic year following the summer/fall of first enrollment. The graduation rates reported here are based on the IPEDS Graduation Rate Survey and may differ slightly from those reported by the Texas Higher Education Coordinating Board.

Most students at U. T. Brownsville matriculate at Texas Southmost College, so historical graduation rates could not be accurately calculated for the campus prior to fall 2000.

U. T. Tyler did not admit freshmen until summer/fall 1998, their graduation rates begin with the 1998 entering cohort.

Graduation rate targets were submitted by U. T. System institutions and approved by the Board of Regents in May 2006.

N/A - Data not available.

Notes:

Graduation rates are for first-time, full-time, degree-seeking undergraduates who begin in the summer/fall of the enrollment year and graduate at the same institution. The cumulative rates represent the sum of degrees conferred at the end of the sixth academic year following the summer/fall of first enrollment.

U. T. Brownsville is not included because first-time undergraduates typically matriculate at Texas Southmost College.

U. T. Tyler did not admit freshmen until summer/fall 1998 and class size was limited until fall 2003. The graduation rate for the fall 1999 cohort was corrected by U. T. Tyler and will vary from the rate reported by the Texas Higher Education Coordinating Board.

Graduation rates for international students are inconsistent because of variability in social security numbers (SSNs). For example, at U. T. Austin, adjusting for changed SSNs, the graduation rate for international students would be 80.9% for the 2002 cohort.

** Number of students too small to report.

| | % Doctoral | 50.0% | 53.8% | 46.5% | 61.7% | 40.8% | -9.2 |

Notes:

¹ Percent earning a master's certificate or above in five or less years.

² Percent earning a doctoral certificate in ten or less years. Doctoral percentages do not include students who received a master's level award.

³ Increased number of master's programs led to an increase in cohort size for SWMC-Dallas in 2004. Specifically, both Physical Therapy and Physician Assistant studies transitioned to master level programs.

⁴ UTMB-Galveston excludes students who transferred from other institutions or students who matriculated in semesters other than fall.

Notes:

The number of graduates represent baccalaureate recipients who started college in a Texas public institution within 10 years of their graduation date. Out-of-state transfer students and students who took more than 10 years to graduate are excluded from this table. Consequently, the number reported in this table will not match the total number of degrees published elsewhere. In addition, enrollment in summer semesters were not included in the average semesters enrolled.

Notes:

Beginning in AY 2004-05, percentages are based on the percent of baccalaureate graduates employed in Texas in the 4th quarter of the calendar year in which the program ends and/or enrolled in a Texas graduate or professional program in the fall semester of the next fiscal year. Prior to AY 2004-05, percentages are based on the percent employed and/or enrolled within 1 year after graduation.

Beginning in AY 2007-08, for health institutions, the THECB began reporting the percent of baccalaureate graduates employed or enrolled in Texas to include nursing graduates only.

Notes:

For academic institutions, pass rates represent the percentage of initial test takers who pass all parts of licensure exams either before graduation from the program or within the twelve months immediately following graduation from the program.

At U. T. El Paso, passing the Fundamental of Engineering licensure exam has not been a degree requirement since 2003-04. Consequently, students may take the exam in practice mode without completing the necessary coursework. This practice has resulted in lower institutional pass rates. At U. T. Arlington, fewer students are taking the Engineering Licensure Exam resulting in more fluctuation in exam pass rates.

For health institutions, pass rates represent the percentage of initial test takers who pass exams during the reporting period. Only certain cohorts of MSN graduates are required to take the Advanced Practice Nursing examination, and it is given two years after degree completion.

The School of Allied Health changed its name to the School of Health Professions in FY 2007-08.

General Analysis – Degrees and Certificates Awarded

System institutions produce over one-third of the degrees and certificates awarded by public universities and almost two thirds of health care degrees and certificates awarded by health-related institutions in Texas.

In 2008-09, U. T. System institutions awarded 41,779 degrees and certificates, an increase of 4,989 degrees or 13.6% over the 2004-05 academic year.

- The number of degrees and certificates awarded at the academic institutions increased from 33,778 in 2004-05 to 38,276 in 2008-09, a 13.3% increase. Degrees awarded at the baccalaureate level grew by 17.6%, master level by 4.6% and the doctoral level by 12.3%.
- At the health institutions, the number of degrees and certificates awarded increased from 3,012 to 3,503, a 16.3% increase over the same time period.

Overall, around 56% of the awards went to women, remaining constant over the past several years. At the health institutions, the growth rate of degrees and certificates awarded to women was 18.1% from 2004-05 to 2008-09, compared to a 13.3% increase for men.

- In 2008-09, women earned 57.5% of baccalaureate degrees at the academic institutions and 70.7% of the certificates and baccalaureate degrees at the health institutions.
- At the graduate/professional level, women earned 51.2% of the awards at academic institutions and 60.2% at health institutions.

Systemwide, the proportion of degrees and certificates awarded to African American and Hispanic students increased over time, while the proportion awarded to Asian American students remained constant and white students decreased. In 2008-09, over half of the awards were to non-white and International students with Hispanics receiving almost one-third of the total awards (30.4%).

- At the undergraduate level, non-white and International students earned 56.0% of the degrees at academic institutions and 43.7% of degrees and certificates at the health institutions.
- At the graduate/professional level, non-white and International students earned 55.1% of the degrees and certificates at academic institutions and 41.9% of degrees and certificates at health institutions.

With an increased emphasis nationally in the areas of science, technology, engineering and mathematics (STEM), U. T. System contributed to these degrees at every level. In 2008, 22.2% of baccalaureate, 20.3% of master's and 47.4% of doctoral degrees awarded at U. T. System academic institutions were in a STEM field. Overall, more than one out of five degrees awarded at U. T. System academic institutions was a STEM degree (22.6%), a higher percentage than other public universities in Texas (18.2%) and the nation (18.5%).

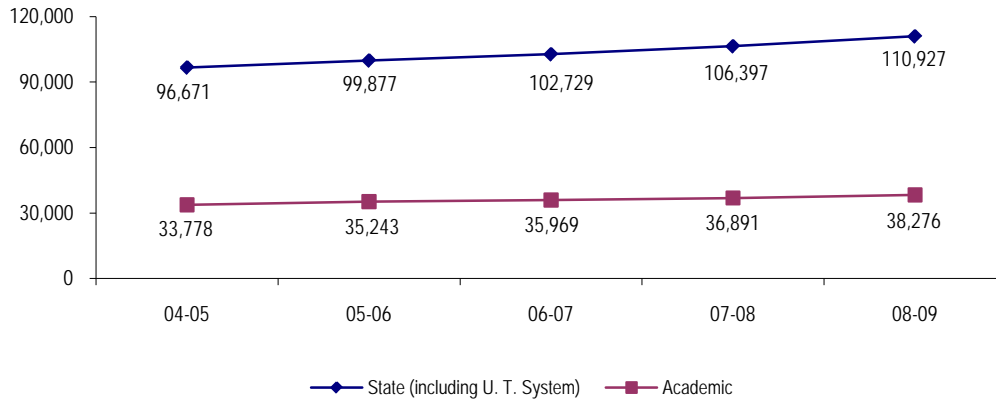

U.T. System institutions increased the number of health professional degrees to meet growing demands within the state. The number of nursing degrees awarded at the academic and health institutions increased by 23.3%, from 1,782 in 2004-05 to 2,197 in 2008-09.

- At the academic institutions, baccalaureate degrees in nursing increased from 769 to 1,044 (35.8%) and master's degrees in nursing increased from 160 to 215 (34.4%).
- At the health institutions, baccalaureate degrees in nursing increased from 607 to 615 (1.3%) and master's degrees in nursing increased from 211 to 260 (23.2%).

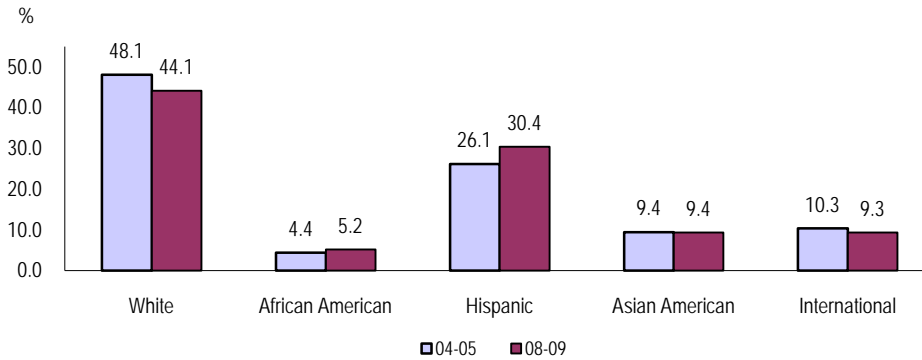

The health institutions also significantly increased the number of doctoral degrees in Biomedical Sciences (by 55.2%) from 183 in 2004-05 to 284 in 2008-09. The number of professional medical degrees increased from 791 to 819 (3.5%), while the number of professional dental degrees increased by 11.3%, from 150 to 167 during the same period.

| | Engineering | 9.7 | 5.4 | 6.1 |
| | Mathematics | 1.4 | 1.0 | 1.2 |

Notes:

Data include four-year public, degree-granting, Title IV participating institutions. Theological and health-related institutions have been excluded. U. T. System institutions are excluded from 'Texas Public, Other' category.

STEM majors are based on the NSF STEM classification. Includes chemistry; engineering; mathematics; physics/astronomy; agricultural, computer, environmental, geo- and life/biological sciences and technology/technician-related fields such as electronic and computer engineering and environmental control technology.

General Analysis – Semester Credit Hours (SCH) and Full Time Equivalent (FTE) Students

From fall 2005 to fall 2009, the number of semester credit hours taught at U. T. System academic institutions increased from over 1.9 million to more than 2.0 million, a 7.7% increase*. Most of this increase occurred at the undergraduate level, growing from almost 1.7 million to just over 1.8 million semester credit hours, or 7.3%.

- The number of master's hours increased by almost 25,000 semester credit hours from 179,152 to 203,999 (13.9%).
- The number of doctoral hours increased from 56,378 to 61,161 (8.5%).
- The number of professional credit hours decreased from 26,973 to 23,917 (-11.3%).

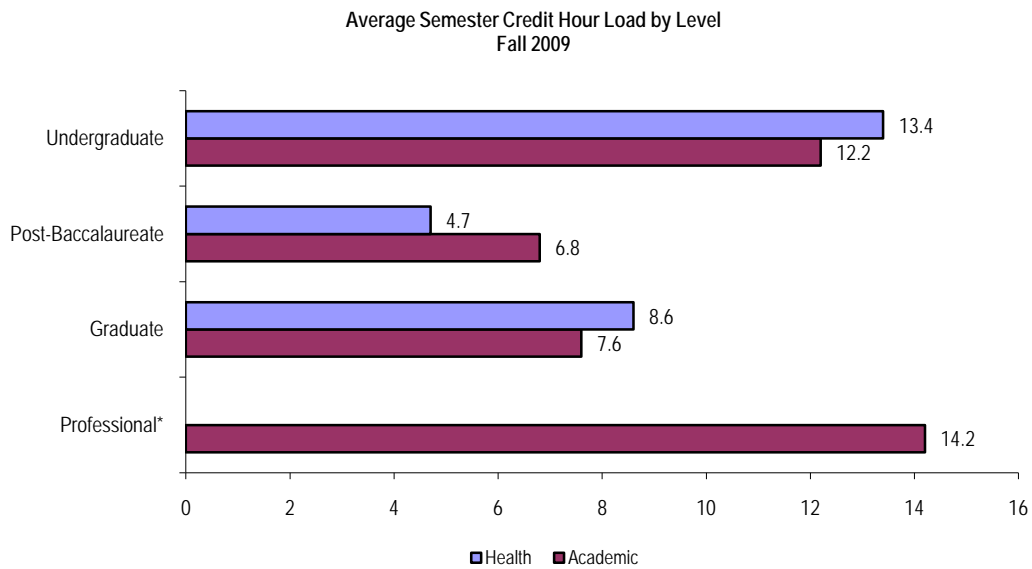

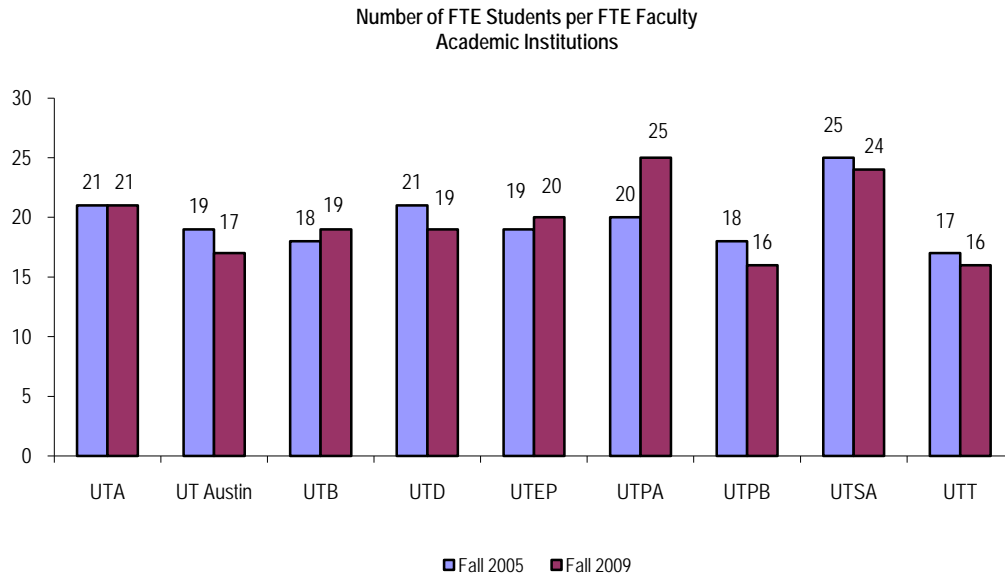

From fall 2005 to fall 2009, the number of faculty increased at a faster rate than enrollment. This resulted in lower student to faculty ratios at five U. T. System academic institutions in fall 2009:

- U. T. Austin (17:1), U. T. Dallas (19:1), U. T. Permian Basin (16:1), U. T. San Antonio (24:1), and U. T. Tyler (16:1).
- U. T. Pan American has the largest student/faculty ratio at 25 to 1, resulting from a shift in faculty member assignments to include research and public service and less direct instruction.

From fall 2005 to fall 2009, the average semester credit hours (SCH) for undergraduate and graduate students increased slightly from 12.1 to 12.2 and 7.6 to 7.7 semester credit hours respectively.

*Comparable information is not available for health institutions because detailed semester credit hour data are not collected by the Texas Higher Education Coordinating Board.

SCH and FTE Students

*SCH data for professional students at the health institutions are not available.

| | Ratio | 17 to 1 | 17 to 1 | 16 to 1 | 16 to 1 | 16 to 1 |

Notes:

Full-time equivalent (FTE) students represent the sum of undergraduate semester credit hours divided by 15, master's and professional semester credit hours divided by 12, doctoral semester credit hours divided by 9. Semester credit hours include state-funded, non-state-funded and excess hours.

FTE faculty includes tenured, tenure-track and professional faculty ranks.

In fall 2006, U. T. Pan American revised the proportion of faculty members' assignments from direct instruction to more appropriately reflect research and public service expectations. This resulted in lower FTE faculty counts and higher student/faculty ratios than in past years.

U. T. Brownsville includes students who matriculate through Texas Southmost College and faculty in Master Technical Instructor ranks.

| | Ratio | 2.0 to 1 | 2.0 to 1 | 2.0 to 1 | 2.2 to 1 | 2.3 to 1 |

Notes:

Full-time equivalent (FTE) students represent the sum of undergraduate semester credit hours divided by 15, master's semester credit hours divided by 12, doctoral semester credit hours divided by 9 and professional/professional specialty headcount enrollments. Semester credit hours include state-funded, non-state-funded and excess hours.

FTE faculty includes tenured, tenure-track and professional faculty ranks.

M. D. Anderson Cancer Center admits a small number of Health Professions undergraduates each year (210 FTE students in fall 2009). However, MDACC collaborates extensively with the Health Science Center-Houston to serve hundreds of students who rotate through their joint programs. In fall 2009, this included 587 graduate students shared with HSC-H.

General Analysis – Faculty and Staff

To keep pace with enrollment and research growth, U. T. System institutions employ an increasing number of faculty and staff each year.

From fall 2005 to fall 2009, the number of faculty employed by U. T. System institutions increased by 11.5%, from 16,685 to 18,607.

- At the academic institutions, the number of faculty increased from 9,267 to 10,204, a 10.1% increase, driven primarily by enrollment and research growth.
- At the health institutions, the number of faculty increased from 7,418 to 8,403, or 13.3%. The increase in health faculty was driven by enrollment increases and the expansion of research and clinical care activities at these institutions.

Following a national trend, the proportion of faculty in tenured/tenure-track positions (professor, associate professor, assistant professor and instructor) is decreasing, from 43.9% in fall 2005 to 41.3% in fall 2009.

Although the majority of faculty at U. T. System are men, the overall proportion of women increased between fall 2005 and fall 2009, from 38.8% to 40.5%.

- At the academic institutions, the proportion of women faculty increased at all levels; from 24.8% to 26.0% for tenured women, from 39.4% to 42.9% for tenure-track women, and from 50.9% to 51.2% for other professional women.
- At the health institutions, the proportion of women faculty also increased at all levels. The proportion of tenured women increased from 23.0% to 26.3%, tenure-track women increased from 32.3% to 34.3%, and other professional women faculty increased from 43.2% to 44.5%.

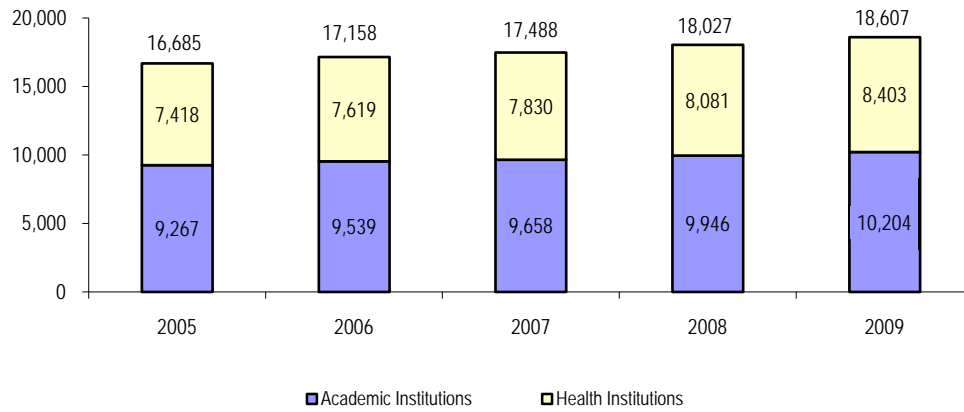

Faculty employed at both the academic and health institutions were slightly more diverse in fall 2009 than fall 2005.

- Within the academic institutions, the proportion of white faculty declined from 70.9% in 2005 to 68.1% in 2009. The representation of most of the non-white ethnic groups increased during this same time period. The proportion of African American faculty increased slightly from 2.7% to 3.0%, Hispanic from 15.1% to 15.3% and Asian American faculty increased from 7.9% to 9.1%. The percentage of International faculty increased from 2.9% to 3.6% and the percentage of Native American faculty remained about the same at less than 1%.
- At the health institutions, the proportion of white faculty decreased from 67.4% in 2005 to 63.2% in 2009. The Hispanic faculty increased from 7.1% to 7.8%, Asian American faculty from 18.8% to 21.6% and International faculty from 3.3% to 3.6%. The percentage of African American faculty remained the same at 3.1%.

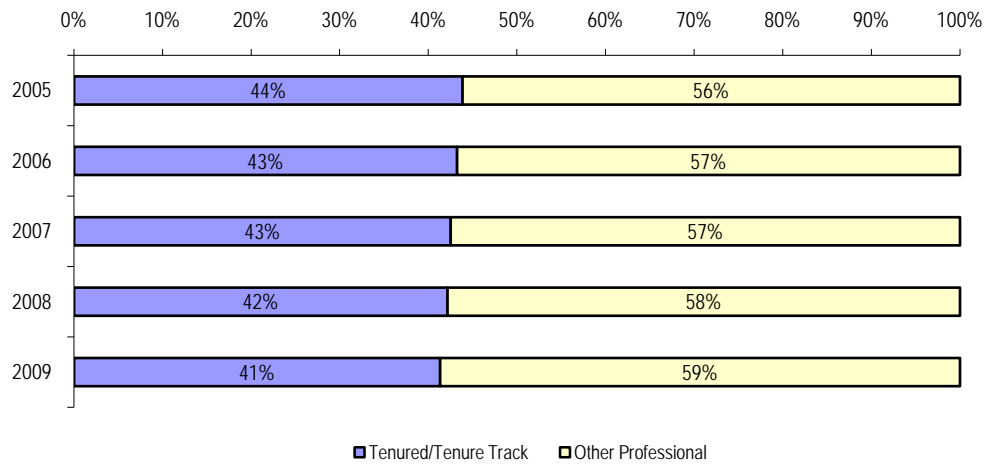

In fall 2009, there were 6,238 administrative staff, 60,355 other non-faculty staff and 21,483 student employees employed by U. T. System institutions. From fall 2005 to fall 2009, administrative and non-faculty staff increased from 61,684 to 66,593, an 8.0% increase. Student employees increased from 18,973 to 21,483, a 13.2% increase.

Notes:

Tenured/tenure-track faculty include professors, associate professors, assistant professors and instructors. Other professionals include lecturers, visiting teachers and special, adjunct, and emeritus faculty. Graduate teaching assistants are not included. In Fall 2009, U. T. Dallas and U. T. Tyler revised ethnic distributions to correct errors caused by a recent software conversion.

Notes:

Tenured/tenure-track faculty include professors, associate professors, assistant professors and instructors. Other professionals include lecturers, visiting teachers and special, adjunct, and emeritus faculty. Graduate teaching assistants are not included. In Fall 2009, U. T. Dallas and U. T. Tyler revised ethnic distributions to correct errors caused by a recent software conversion.

Notes:

Beginning in 2007, UTMB-Galveston revised its faculty compensation plan, resulting in a decrease in the number of tenure-track faculty.

Tenured/tenure-track faculty include professors, associate professors, assistant professors and instructors. Other professionals include lecturers, visiting teachers, clinical and special, adjunct, and emeritus faculty. Graduate teaching assistants are not included.

Notes:

Full-time equivalent faculty are defined as 1 FTE=100% appointment and have been rounded to the nearest whole number. FTE faculty have an academic rank of Professor, Associate Professor, Assistant Professor, or Other and have an appointment code in direct instruction or an administrative appointment which directly supplements the teaching function.

In fall 2006, U. T. Pan American revised the proportion of faculty members' assignments from direct instruction to more appropriately reflect research and public service expectations. This resulted in lower FTE faculty counts than past years.

Notes:

Administrative and other non-faculty exclude faculty positions and do not entail significant direct instructional activities.

Administrative includes executive, administrative and managerial positions which require performance of work directly related to management policies or general business operations of the institution, department or subdivision. Other non-faculty includes other professional, technical, clerical, skilled crafts and service related positions. Student employees are those positions for whom student status is a condition of employment.

Changes in previous years' data for Administrative and Other Non-Faculty are the result of category refinements.

Notes:

Administrative and other non-faculty exclude faculty positions and do not entail significant direct instructional activities.

Administrative includes executive, administrative and managerial positions which require performance of work directly related to management policies or general business operations of the institution, department or subdivision. Other non-faculty includes other professional, technical, clerical, skilled crafts and service related positions. Student employees are those positions for whom student status is a condition of employment.

Changes in previous years' data for Administrative and Other Non-Faculty are the result of category refinements.

The 2008 increase in M.D. Anderson's Administrative total is the result of reclassifying employees whose major function is direct supervision of others. These employees were previously reported as Other Non-Faculty.

General Analysis – Research

Research is not only a measure of faculty innovation, competitiveness and productivity, but also an economic driver for Texas. U. T. System research expenditures from all sources were \$2.25 billion in FY 2009. Federal research expenditures increased by 19.1%, from just over \$1 billion in FY 2005 to \$1.25 billion in FY 2009.

- Between FY 2005 and FY 2009, total research expenditures increased by almost \$170 million at M. D. Anderson, \$112 million at U. T. Austin and nearly \$60 million or more at U. T. Southwestern Medical Center at Dallas, U. T. Health Science Center–Houston, and U. T. Health Science Center–San Antonio.
- In FY 2009, federal research expenditures accounted for 55.7%, private research expenditures accounted for 20.0% and state expenditures accounted for 16.4% of total U. T. System research expenditures.
- Between FY 2005 and FY 2009, federal research expenditures increased by 27.8% at academic institutions and by 14.7% at health institutions. The largest dollar increases for academic institutions were U. T. Austin, U. T. San Antonio, and U. T. Arlington.

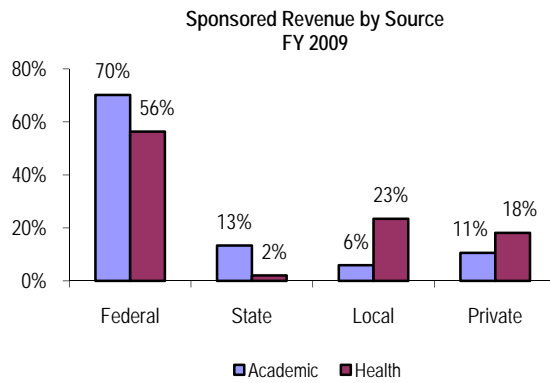

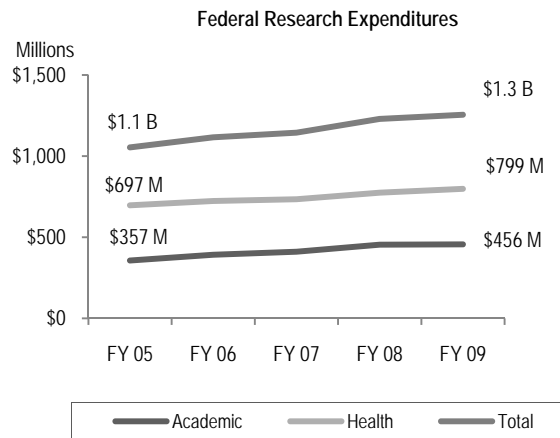

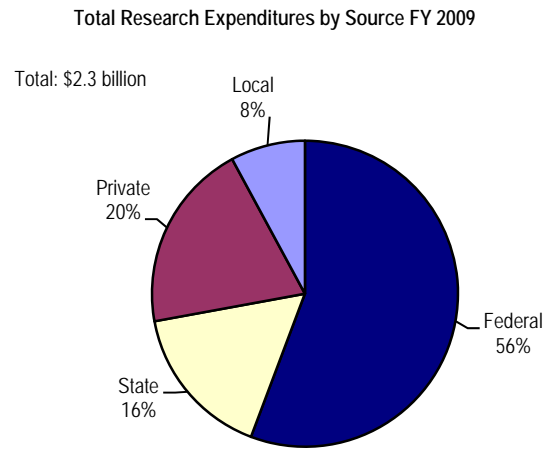

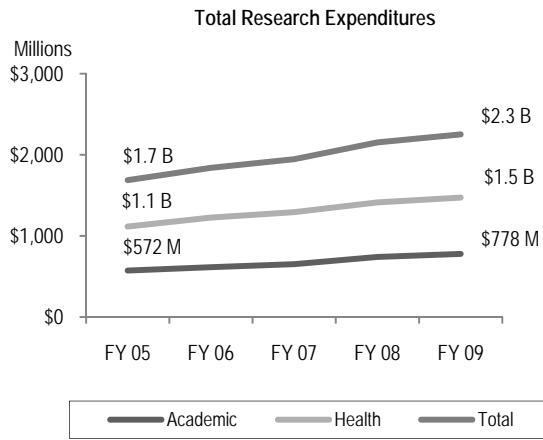

Sponsored revenue is a more comprehensive measure of an institution's overall success in securing funding to support research, public service, training and other activities. In FY 2009, U. T. System institutions received more than \$2.73 billion from all sources, an increase of 35.7% from \$2.01 billion in FY 2005.

- Sponsored revenue received from federal sources accounted for 61.7% of the total while 16.7% came from local sources, 15.2% came from private sources and 6.4% came from state sources.
- Between FY 2005 and FY 2009, sponsored revenue at health institutions increased by 37.0% and increased by 33.8% at academic institutions.

Another measure of research productivity is the number of external research grants held by tenured, tenure-track and non-tenured faculty and the average number of research dollars per full-time equivalent (FTE) tenured/tenure-track faculty.

- Between FY 2005 and FY 2009, the number of research grants to tenured/tenure-track faculty increased at seven of the nine academic institutions.
- Research expenditures per FTE tenured/tenure-track faculty increased at eight of the nine academic institutions and averaged more than \$100 thousand at U. T. Austin, U. T. Dallas, and U. T. El Paso.
- Research expenditures per FTE tenured/tenure-track faculty increased at every health institution between FY 2005 and FY 2009 and averaged over \$350 thousand at four of the six health institutions in FY 2009.

Notes:

Research expenditures are monies spent to support research activities and are funded by government and private entities and include indirect costs and pass-throughs to institutions. Research is systematic study directed toward fuller scientific knowledge or use of knowledge directed toward the production of useful materials, devices, systems or methods including design and development of prototypes and processes.

Notes:

Research expenditures include indirect costs and pass-throughs to institutions.

In FY 2007-08, Arlington reclassified a portion of faculty and GRA salaries to more appropriately reflect time spent on research.

Subsequent to the 2008 Annual Financial Report, it was determined that the research amounts for Arlington had been overstated. In 2009, the 2008 amounts for U. T. Arlington were restated.

Notes:

Federal research expenditures are monies spent to support research activities and are funded by federal governmental entities in the form of contracts, grants and agreements, including indirect costs and federal monies passed through state agencies. Federal research expenditures are considered a national benchmark to measure institutions' research success.

Notes:

Sponsored revenue are monies received from governmental and private entities to support services performed on grants, contracts and agreements, including indirect cost recoveries and pass-throughs to institutions. Sponsored revenue is a comprehensive measure of an institution's overall success in securing funding to support research, public service, training and other activities.

| | # NT faculty holding grants | 5 | 5 | 2 | 7 | 6 |

Notes:

Extramural grants include competitive, external grants that are officially made to a principal investigator through the institution. All extramural grants held by faculty are included, including multi-year grants. For multi-investigator grants, only the principle investigator is counted. The following types of grants have been excluded: Block grants or other noncompetitive grants made to the institution, contract research, and grants awarded to a principal investigator other than faculty.

T/TT faculty = Tenured/tenured-track faculty (professors, associate professors, assistant professors and instructors).

NT = Non-tenured track faculty (lecturers, visiting, clinical and special, adjunct and emeritus faculty).

U. T. Austin revised previous years to include multi-year grants.

U. T. Permian Basin revised previous years to reflect the measure definition for extramural grants.

Notes:

Includes competitive, external grants that are officially made to a principal investigator through the institution; i.e., those tracked through an Office of Sponsored Programs or a similar office.

For multi-investigator grants, only the principle investigator is counted.

T/TT faculty = Tenured/tenured-track faculty (professors, associate professors, assistant professors and instructors).

NT = Non-tenured track faculty (lecturers, visiting, clinical and special, adjunct and emeritus faculty).

M.D. Anderson's "Tenure/tenure-track" equivalent faculty are awarded seven-year term appointments, renewable through a formal promotion and reappointment process. A refinement in data collection resulted in the increase in number of grants to T/TT faculty beginning AY 2004-05.

General Analysis – Finance

Major revenue sources for U. T. System institutions include state appropriations, government grants and contracts, tuition & fees for the academic institutions, and sales and services of hospitals for the health institutions.

The percent of revenues from state appropriations relative to total revenues declined among the academic institutions but increased among the health institutions.

- In FY 2009, state appropriations accounted for 24.4% of the academic institutions' revenue, down from 25.2% in FY 2005.
- State appropriations accounted for 15.6% of the health institutions' revenue in FY 2009, up from 14.3% in FY 2005.

When adjusted for inflation, state appropriations increased from \$4,800 to \$5,060 per full-time equivalent (FTE) student between FY 2005 and FY 2009 for all academic institutions, but still remained well below the benchmark of \$5,850 per FTE student in FY 2002.

In fall 2009, the largest categories of expenses for all U. T. System institutions are hospitals and clinics, instruction, institutional support and physical plant, and research.

- From FY 2005 to FY 2009, operating expenses for hospitals and clinics increased 25.0%, from \$2.37 billion to \$2.96 billion; instruction increased 23.1%, from \$2.11 billion to \$2.60 billion; institutional support and physical plant expenses increased 94.1%, from \$1.05 billion to \$2.04 billion (some of this increase was a result of a change in post employment benefits reporting requirements in FY 2008); and research expenses increased 35.1%, from \$1.32 billion to \$1.78 billion.

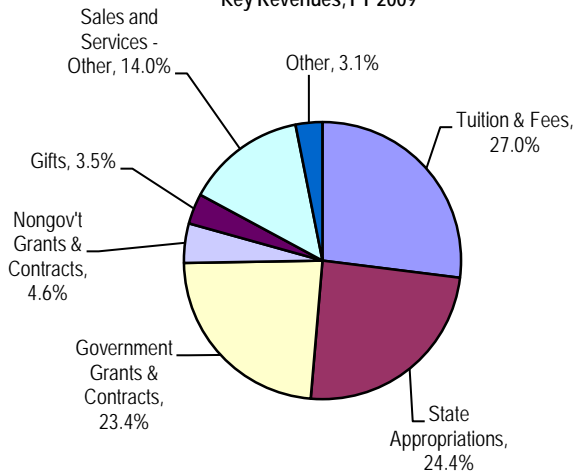

Even with the economic downturn, endowments for the U. T. System increased slightly (3.2%) from over \$13.0 billion to almost \$13.5 billion between FY 2005 and FY 2009, but remained well below a high of \$16.8 billion in FY 2007.

- For the academic institutions, endowments increased from \$6.16 billion to \$6.36 billion from FY 2005 to FY 2009, a 3.3% increase, and by 14.1% from \$2.3 billion to \$2.6 billion for the health institutions.
- Donor support increased for U. T. academic and health institutions from \$488.5 million to \$612.7 million between FY 2005 and FY 2009, but remained below a high of \$801 million in FY 2008.
- Donor support increased at six of the nine academic institutions and total donor support increased from \$200 million in FY 2005 to \$297 million in FY 2009, a 48.1% increase. Donor support increased at three of the six health institutions and total support increased from \$283 million in FY 2005 to \$314 million in FY 2009, a 10.8% increase.
- U. T. System health institutions generate revenue from hospital patient care. Faculty also provide a significant amount of unsponsored charity care in state-owned and affiliated facilities.
- Patient care revenue in FY 2008 was \$3.58 billion, an increase of 62.3% over FY 2004.
- Total charges for unsponsored charity care provided by U. T. System faculty and hospitals were over \$1.4 billion in FY 2008.

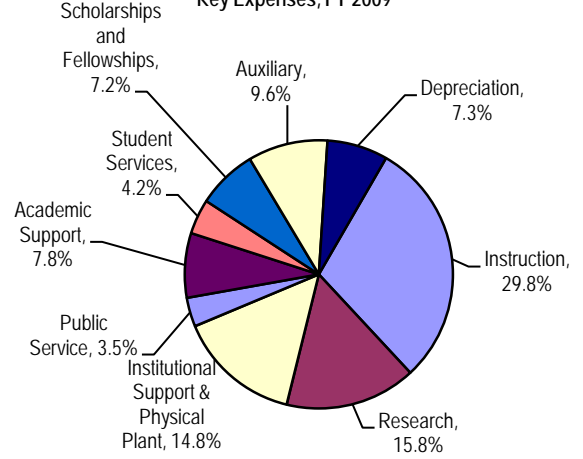

- The amount of money expended for administrative costs relative to total expenses decreased from 7.8% to 7.4% for academic institutions and remained at 5.7% at health institutions from FY 2005 to FY 2009.

Finance Information

Notes:

U. T. System totals do not include U. T. Brownsville.

Tuition and fee revenue is net of scholarship and fellowship discounts and waivers.

State appropriations include general revenue support from the State of Texas for instruction and operations, infrastructure support, special items, tuition revenue bond debt service, and group health insurance and employee benefits.

All revenue and expense data were adjusted to the FY 2002 base year for inflation using the Consumer Price Index - Urban (CPI - U) for September of each year.

Notes:

¹ These represent revenues reported on the U. T. System Annual Financial Report (AFR). Revenues do not include transfers between entities, such as transfers between System Administration and the component institutions, or transfers between component institutions and other state agencies. This prevents the double counting of the same funds as revenue initially by the entities sending the funds, and then subsequently by the entity receiving the funds. The "Other" category for FY09 includes investment losses.

² Subsequent to the 2008 AFR, it was determined that the research amounts for U. T. Arlington had been overstated. In 2009, the 2008 amounts were restated.

³ Due to the implementation of GASB Statement 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other than Pensions* (OPEB) in 2008, the System reported \$422.7 million for the net OPEB obligation liability. GASB 45 requires accrual-based measurement and recognition of OPEB expenses, such as retiree medical and dental costs, over the employees' years of service, along with the related liability. Pursuant to GASB 45, the System has accrued the liability and is recognizing it over a 30 year period so that the increase in the liabilities does not occur all in one year. The System is not required to fund the OPEB liability; instead, the difference between the OPEB cost and the System's contributions to the plan will increase the unfunded actuarial accrued liability.

Notes:

These totals include endowment funds managed by UTIMCO as well as those held in trust by other entities, as reported to the Council for Aid to Education each year. (Information offered on endowment funds not managed by UTIMCO is reported by each institution).

Endowments for U. T. Austin include 30 percent of the Permanent University Fund (PUF) market value and endowments for the U. T. System include 37 percent of the PUF market value.

Endowment values for U. T. System Administration exclude the Permanent Health Fund, which is reported by the institutions.

Notes:

Administrative costs are institutional support expenses for executive management, fiscal operations, general administration and logistical services, administrative computing support, and public relations/development. Total costs, as defined by the LBB, exclude expenses of auxiliary enterprises and service departments.

*System Administration increases are primarily a result of other post employment benefits which were included for the first time in 2008. Due to the implementation of GASB Statement 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other than Pensions* (OPEB) in 2008, the System reported \$422.7 million for the net OPEB obligation liability. GASB 45 requires accrual-based measurement and recognition of OPEB expenses, such as retiree medical and dental costs, over the employees' years of service, along with the related liability. Pursuant to GASB 45, the System has accrued the liability and is recognizing it over a 30 year period so that the increase in the liabilities does not occur all in one year. The System is not required to fund the OPEB liability; instead, the difference between the OPEB cost and the System's contributions to the plan will increase the unfunded actuarial accrued liability.
