Average Total Academic Cost represents the sum of all statutory, designated (including differential tuition), and board-authorized tuition, along with mandatory fees (including college and course fees). It is derived from actual fee bills for resident undergraduate students enrolled in 15 semester credit hours in the fall and spring semesters.

Average Net Academic Cost for all full-time students is derived by subtracting the total need-based grant aid from the total academic costs of all students and then dividing by the total number of students.

As an example: Of all full-time resident undergraduates at UT Arlington, 54.2% received at least one dollar in need-based grant and scholarship aid.

On average, this aid covered 76.1% of total academic costs for this subgroup.

Retention is calculated as the percentage of first-time, full-time, degree-seeking undergraduates who are enrolled in at least 12 semester credit hours (SCH) in the fall semester and are still enrolled at the same initial institution one fall semester later. Retention information may differ from what is reported by the Texas Higher Education Coordinating Board and UT Institutions. The UT System utilizes an internal data warehouse to track student progress over time.

UT Austin International transfer students are not included in these calculations because they include foreign exchange students in their reported transfer enrollment numbers. These temporary students are not expected to graduate and therefore should not be included in the graduation metric.

When students take out student loans, they are investing in their future. It is important to view loan debt in context with what the future return on investment (ROI) will be. One way to gauge ROI is through earnings outcomes from post-graduation employment (highlights on the following pages).

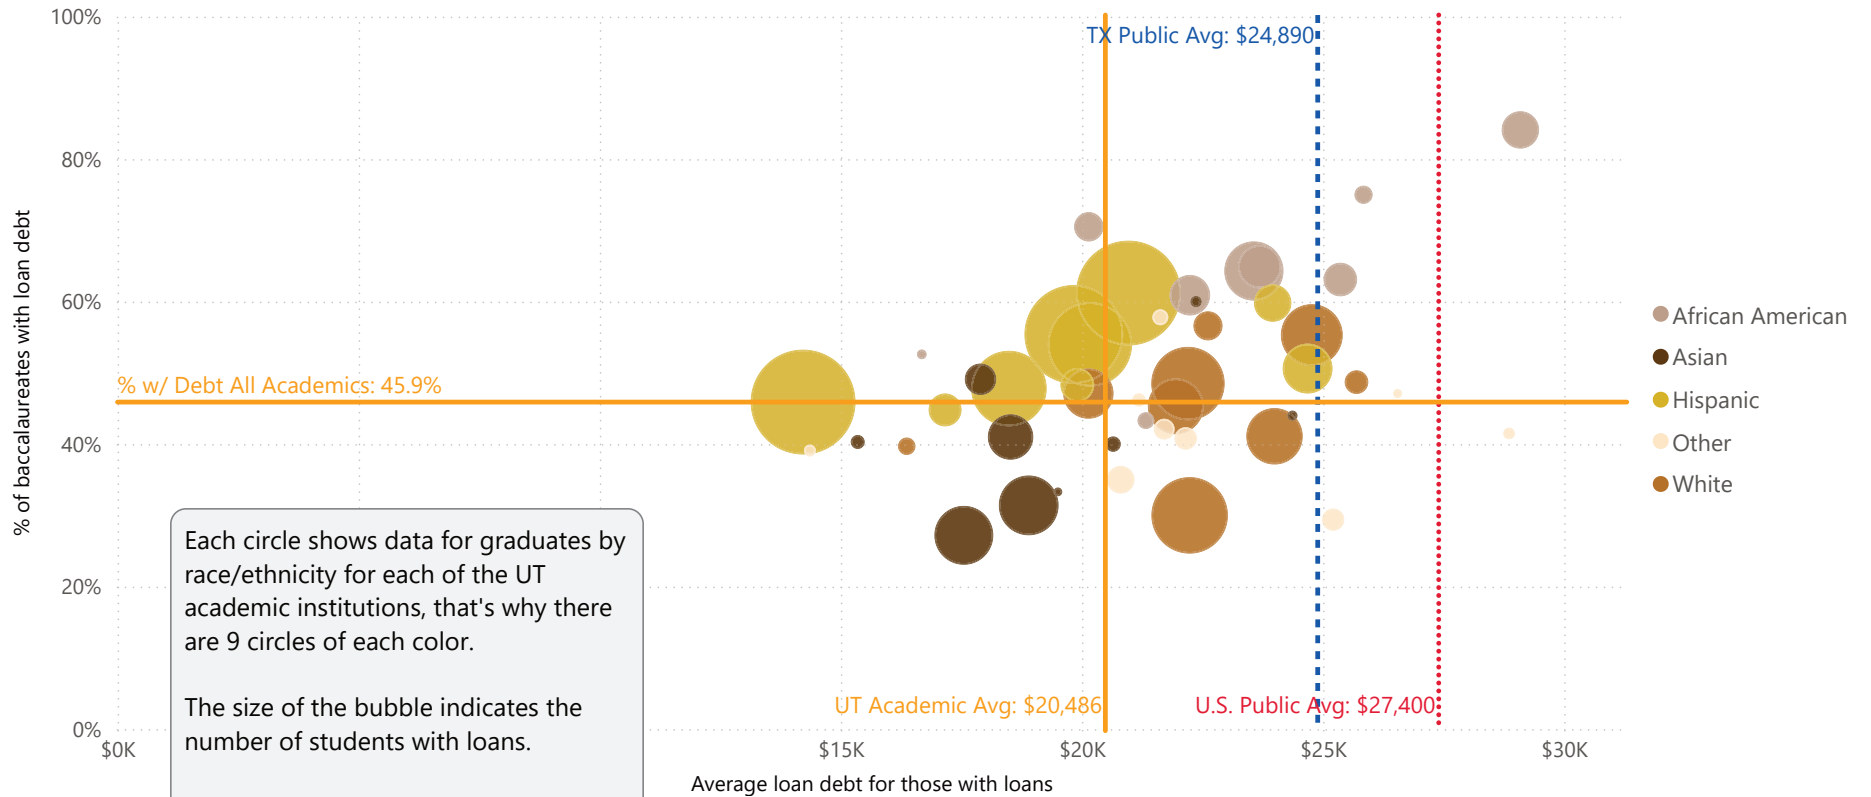

The average loan debt for UT baccalaureates in the most recent graduating cohort was \$20,486.

For all Texas public universities, the average was \$24,890. The national average for public universities was \$27,400.

Earnings data reflect data for graduates employed full-time for a full year in the State of Texas. For baccalaureate graduates, the median debt is estimated for those who initially enrolled at the institution as first-time-in-college (FTIC) students. For UTRGV, 1st-Year is based on the 2017 graduating cohort; 5th-Year and 10th-Year are based on five graduating cohorts from the combination of UTB and UTPA. Student loan debt for health-related institutions is not included because of the limited number of first-time-in-college students at these institutions, which only admit students who have completed college core curriculum elsewhere. Historic wage data is not currently available for Stephen F. Austin State University graduates. UTSWMC does not offer baccalaureate degrees.

Median student loan debt is the median of the student loan debt that borrowers owed at the time they earned their degree. The figures here only include debt incurred at a specific medical school.

National context for medical student loan debt: 69.1% of graduates had medical school debt. The median medical school debt reported was \$200,000 (from the Association of American Medical Colleges (AAMC) Summary of the 2022 Graduate Questionnaire).

Medical school graduates cannot practice without completing at least one year of residency. The length of residency is based on specialty, and most are between 3 and 7 years. The length of residency and specialty has a direct impact on wages. 1st-Year wages are not displayed because all medical school graduates are in residency programs at this time.

* A portion of "State" expenditures includes an institution's hospital patient income that is re-invested in the research enterprise.

Beginning with FY 2021, OIRA reports the combined research expenditures for UTT and UTHSCT under UTT. For years prior to 2021, research expenditures for UTT and UTHSCT were not combined, resulting in the large 5-Yr % change shown for UTT.

An additional metric of patient care: UT physician practices provided care to **2,497,912 unique patients** in FY 2023. The number of unique patients represents the number of unique medical records with at least one active visit within the year. According to Fitch Ratings, the significance is that this measures the number of unique patients accessing—as well as remaining in—the healthcare organization. This is an indicator of access, demand, and market presence.

For FY 2023, **44.7%** of UT System revenues comes from hospital, clinic, and professional fees related to patient care.

Hospitals and clinics account for **37.0%** of total expenses.
