I recommend ratification and approval of the award as made by the Board of Control and that Mr. C. H. Sparenberg, Comptroller, be authorized to sign the lease agreement:

Rental agreement between The University of Texas and E. E. D. FARMER SCHOLARSHIP FUND: The Faculty Committee of the E. D. Farmer Scholarship Fund has reported that the anticipated balance in this fund on August 31, 1956, will be \$17,897.30 and makes the following recommendations concerning its disposition:

1. That the Farmer Scholarship (1955-56) now held by Rodolfo Castillo at The University of Texas be extended to February 1, 1957, with a stipend of \$1,650 (\$600 for the summer term of 1956, and \$1,050 for the fall semester of 1956-57);
2. That two scholarships of \$2,100 each be made available to students from Mexico who will attend The University of Texas during the scholastic year 1956-57;
3. That three scholarships of \$2,100 each be made available to students of The University of Texas to attend the National University of Mexico, March-December, 1957;
4. That, in order to continue the exchange of professors between The University of Texas and higher institutions of learning in Mexico, the following grants be made to professors:
 - a. One of \$1,500 to Professor Joe B. Frantz, of The University of Texas, to enable him to study in Mexico for three months of the summer of 1956;
 - b. One of \$1,600 to Professor Wigberto Jimenez Moreno, of The University of Mexico, to cooperate in a seminar of the Department of Anthropology at The University of Texas, in either the fall or the spring semester of 1956-57;
 - c. One of \$1,000 to Professor R. B. Long, of The University of Texas, to teach English in the Instituto Tecnologico of Monterrey, Mexico, during the summer term of 1956;
5. That the balance of this fund, \$1,647.30, be held for future awards or emergencies.

CHANGES IN GRADUATE SCHOOL REGULATIONS: On the recommendations of the Institute of Public Affairs and the Graduate Council, the Graduate Legislative Council, at its meeting on February 27, 1956, approved changing degree requirements for the Degree of Master of Arts (Public Administration) as follows:

A student who holds a degree of Bachelor of Arts, or an equivalent degree such as Bachelor of Business Administration, and whose Master of Arts with a major in Public Administration requires thirty semester hours in addition to a six hour thesis may be allowed to count six hours for a completed LL. B. degree. Such a student, after completing an LL.B. degree, would need to do twenty-four semester hours of approved course work plus a six hour thesis.

I recommend approval.

At the May, 1955, meeting of the Board approval was given to some changes in Graduate School regulations. Dean Brogan has written that since that time the adoption of aptitude tests for undergraduate students and also the special aptitude test for entering Law students have suggested that the Graduate School should include an aptitude test in its requirements. Accordingly, the Graduate School recommends that the recently adopted rules be amended by including the following additional requirements.

1. Each applicant must "make a satisfactory score on the Aptitude Test of the Graduate Record Examinations." This test is the most widely used test in the graduate schools of the American Association of Universities. If this recommendation is approved, it is our expectation to use the scores on this test along with the requirement for satisfactory grades as a basis for eliminating those prospective graduate students who clearly will not be able to conform to the standards of the Graduate School of The University of Texas. During the first year or two we expect to set the acceptable score on the Aptitude Test on a fairly low level in line with the policy adopted for entering freshmen. Thereafter, we will raise the required score to a level consistent with a score that would be made by students with at least a B average from standard colleges or universities.

2. The Graduate Legislative Council also recommended a change so that the average grade of B or better would be required on all advanced work completed, that is on all work which is the equivalent of junior, senior, or graduate work. The reason for this change is that the previous requirements of a B average on all work taken during the last two undergraduate years raised problems in the Registrar's Office as to the exact definition of the last two years of undergraduate work. Under present practices of college students, it is very difficult to define exactly what is included in the last two years of an undergraduate program.

3. An additional recommendation is that students who are allowed to begin graduate work without full standing as graduate students should no longer be placed as Special Students in the appropriate undergraduate school or college but should be registered as Provisional Students in the Graduate School. This change will allow the Graduate Adviser in the student's major department and the Dean of the Graduate School to advise such students and to check the quality of work done by them before they can be considered for admission to regular standing as graduate students.

4. The Graduate Legislative Council also recommended that the former Catalogue statement, Graduate School Catalogue, No. 5413, page 25; be changed by deleting two sentences in parentheses.

Restriction on Admissions

Because there are more applicants than available facilities, it has become necessary to limit the number of students accepted for graduate work in certain areas. (This is true in psychology, library science, and social work. Later it may be necessary to restrict admission in other areas.) See the prerequisites and requirements given under each department or school.

ESTABLISHMENT OF E. P. SCHOCH LECTURES IN CHEMICAL ENGINEERING: The friends and ex-students of Dr. E. P. Schoch, Professor Emeritus of Chemical Engineering, as a means of giving proper and suitable recognition to his work, wish to sponsor and finance for the next five years an annual series of lectures to be known as the "E. P. Schoch Lectures in Chemical Engineering." It is planned that a series of from three to six lectures will be given each year over a period of approximately one week by some person of national renown and accepted

leadership in his particular field of Chemical Engineering, the lectures to be open to the public. I recommend approval of this program and of the following specific recommendations of this group:

1. That the Board of Regents approve of the establishment of the "E. P. Schoch Lectures in Chemical Engineering" as set forth above and accept donations for the support of such lectures.
2. That the University Auditor be empowered to establish, as part of current restricted funds, the "E. P. Schoch Lectures" account, to accept for credit to that account money from various donors received from or transmitted through the "E. P. Schoch Lectures Committee", and to disburse such funds at the direction of said Committee.
3. That the President (or Vice President) appoint a special "E. P. Schoch Lectures Committee", members of which are to be the members of the University's Chemical Engineering faculty (Assistant Professors and above) and four ex-students to be nominated by the Dean of Engineering.
