If the grant is made, Dr. Stevenson requests that his wife, Mrs. Nancy Guy Stevenson, who has served at Stanford University as a research assistant in Psychology, be permitted to work on the project for one or two years on not more than a half-time basis. I recommend that the nepotism rule be waived and Mrs. Stevenson be allowed to be employed.

OUT-OF-STATE TRIPS: I recommend ratification of your approval by "no-objection-within-five-days" procedure of Mail Dockets XXXIV, XXXV, XXXVI, XXXVII, XXXVIII, XXXIX, and XL, copies of which are attached. *Pp. 6 19 - 6 38.*

GRADUATE SCHOOL REGULATIONS: I recommend approval of the following, submitted by the Graduate Legislative Council:

"It is recommended that the present rules on grades of scholarship, General Information Bulletin #5408, pages 67-68, be amended by striking out all exceptions whereby the rules for graduate students are different from the rules for undergraduate students.

"Under item 6, change the present rule to read: The incomplete work must be made up within four months after the symbol X is recorded.

"Under item 7, change the present rule to read: Unless a grade has been reported in the meantime by the instructor, the symbol X shall be changed to symbol F (except in thesis, 98, or dissertation, 99, courses), and the course must be repeated if credit for the work is desired."

The Graduate Legislative Council further recommends:

1. Subject to the following restrictions, graduate credit will be given for grades of A, B, or C, for work done at The University of Texas.
2. All of the advanced work that has been counted or could be counted for the student's graduate major must have a strict B average (not including the thesis or dissertation, for which only A or B will be credited).
3. All of the advanced work that has been counted or could be counted for the student's graduate minor or minors must have a strict B average.
4. A student must also maintain a strict B average on all advanced courses including prerequisite work for his major or minor.
5. In each of the fields of work listed above, for each semester hour with a grade of C the student must make a semester hour with a grade of A.

ATOMIC ENERGY COMMISSION: Because of the increasing interest in uranium prospecting in certain areas of Texas, the Atomic Energy Commission plans to maintain a small office in the State, as a part of their Reconnaissance Branch. The chief of this Branch, Mr. Howard S. Stafford, has requested the University's permission for the AEC office to be located physically with our Bureau of Economic Geology. This arrangement is desirable from the standpoint of our Bureau, since it would enable the Bureau to keep abreast of Atomic Energy Commission field geological activities and uranium developments in Texas. At the present time, the Bureau of Economic Geology maintains some space at the Balcones Research Center for its cooperative program with the U. S. Geological Survey. Space for the Atomic Energy Commission could be provided also in these quarters. I recommend that approval be given for providing office space for the Commission. Dr. John T. Lonsdale, Professor of Geology
